

Bunion Surgery without Crutches

Less time. Less Pain. More Convenience.

The Bledsoe Bunion Boot simplifies post-op rehab for bunion patients.

Cushioned insole and forefoot compression protect the surgical site while enabling patients to walk immediately.

INNOVATIVE

- Gently keeps toe in position
- Better Control
- Reduces Pain
- Greater Comfort
- Reduces Swelling
- Promotes Healing
- Promotes Natural Gait

With the **NEW** Bunion Boot, bunion surgery patients may not need crutches!

Each boot comes with a post-surgical toe-sock. Additional socks are available in an array of colors.

B Bledsoe™

Engineered for Mobility.
Engineered by Bledsoe.

Platform Insole

Maintains neutral joint position.

Auto-mold insole cushions the foot

Reduces unnecessary movement, holding the other toes and foot in position.

Pneumatic Forefoot Pad

Minimizes post operative swelling and facilitates healing by maintaining compression on the forefoot.

Innovative pad-and-band system

Holds the great toe in position with constant gentle pressure.

Provides a smooth natural gait, without putting pressure on the toe

Holds the ankle in place to take pressure off the foot and enhance the gait.

The Bottom Line

One boot fits either foot, reducing inventory.

The Bunion Boot enhances your DME program with suggested L-Code 4360.

**Engineered for Mobility.
